Queensland Turf Producers Association

We grow these varieties on the farm:

PALMETTO Soft Leaf Buffalo

Palmetto has an outstanding emerald green colour that is a true eye catcher.

It performs well in full sun, yet thrives in shaded areas, requiring only a minimum of 3 hours of full sun per day. Salt tolerance makes palmetto excellent for coastal areas.

Palmetto has excellent winter colour and frost tolerances. Palmetto is low grown and low maintenance. Go away for a few weeks holiday and you will not come back to a jungle.

Palmetto once used is never forgotten. Try it and enjoy reduced mowing and fertilizing and its general easy care.

EMPIRE ZOYSIA

Empire has been given the nickname E.Z. grass (pronounced easy grass).

E.Z. to look after: Empire competes well with weeds. Empire requires less mowing than every other commercially grown lawn in Australia. It is water efficient to the extreme. Nothing can look so good with such little water.

E.Z. to keep looking good: Empire tolerates extreme wear, it has low thatching, less scalping, good shade tolerance and a relatively fine leaf.

COUCHES

WINTERGREEN COUCH

Wintergreen Couch is a hardy couch. It has a finer leaf but is so named as it retains its colour through winter. Used extensively on sporting ovals and footpaths, it forms a thicker mat and performs extremely well in heavy traffic.

GREENLEES PARK

Greenlees Park Couch is an easy to maintain variety of couch lawn. It is widely used on home lawns, bowling greens and golf courses. It is a drought hardy, hard wearing grass that forms a dense mat, having moderate water, fertilising and mowing requirements to maintain a good appearance.

CONQUEST COUCH

Conquest Couch is a prestige lawn that can be used in both domestic and commercial situations. It has a fine to medium leaf with very high wear tolerance. It has a deep root system that enables it to be more drought tolerant.
